Recommended Euro Pratik
 Special Purpose Adhesive

Euro Pratik products add natural beauty to your interiors. Colour variance, slubs, weave irregularities and shading that appear in these panels are to enhance natural beauty and are not imperfections. Utmost care has been taken to give accurate description & technical specification. Errors and omission, if any please excuse. Technical specifications of products are subject to change without prior intimation. Use the same batch material to avoid colour variation. Euro Pratik warrants that all products are free from manufacturing defects and perfectly fit for use in normal conditions. No guarantee/warranty of the product after installations. Dimension tolerance +/- 5-10%.

HANDLING

1. Open the Thermolite Panels roll immediately. Do not pressurize while opening it.
2. Wipe the surface clean with cloth in light circular motion.
3. Inspect the material before taking delivery and prior to installation

INSTALLATION

1. Cutting & Machining: Use standard wood working tools and equipment for cutting, routing and drilling. Sharpen your tools before using to remove any burns and feather corner edges.
2. Base Material: Standard quality material like plywood, high density particle or fiber board. The surface of the material must be smooth and free from high moisture content / grease / wax / dust / chips / any foreign particles. Do not paste the sheets on the printed / branding area of the plywood
3. Adhesives: Avoid synthetic rubber or heat-activated adhesives. We recommend "LUXEBOND" (Premium glue from EUROPRATIK)
4. Observe bonding process carefully and apply sufficient pressure
5. After the removal of protection film, there might be solvent on the surface from the adhesive coating of the protection film. It may attract dust because of an electrostatic charge.
6. Under normal circumstances, the 'Curing' process will take approximately 72 hours for the surface to be totally cured. In order to speed up the process, we recommend cleaning of the surface with Colin Glass Cleaner and Soft Micro fiber cloth.

CLEANING & MAINTENANCE

- Avoid cleaning agent containing acids / alkalis / abrasives / alcohol-based / solvent based / petrol-based / pinewood-based / oil-based cleaners.
- Use soft and clean cloth (preferably micro fiber)
- Avoid exposure to direct sunlight, it can gravely affect Thermolite Panels appearance
- Avoid hot cookware or utensils putting directly on the Thermolite Panels.

DISCLAIMER

The Images used in brochure is for artistic representation only and do not form part of any agreement or legal binding on part of EUROPRATIK.
